

THE ALCHEMICAL ALAKH

NEET BIOLOGY

THE LIVING WORLD

100 MCQs • 80 NCERT-based + 20 PYQs

Easy → Moderate → Difficult → Most Difficult → PYQ

Source: uploaded NCERT Reprint 2026–27, Chapter 1

Use: show Question slide → pause → answer slide → explain

Q1 • EASY

The number of known and described species is approximately:

- A) 1.7–1.8 million
- B) 17–18 million
- C) 0.17–0.18 million
- D) 170–180 million

II PAUSE & ANSWER

Correct Answer: A

Explanation

The NCERT states that the number of known and described species ranges between 1.7–1.8 million.

NCERT page: 4

The term biodiversity in the chapter refers to:

- A) Only genetic variation within a species
- B) The number and types of organisms present on Earth
- C) Only the number of animal species
- D) Only ecosystem variety

II PAUSE & ANSWER

Correct Answer: B

Explanation

Here biodiversity is described in terms of the number and types of organisms present on Earth.

NCERT page: 4

The process of giving a standardised name to a living organism is called:

- A) Identification
- B) Classification
- C) Nomenclature
- D) Systematics

II PAUSE & ANSWER

Correct Answer: C

Explanation

Nomenclature is the process of standardising the naming of living organisms.

NCERT page: 4

Correct identification is necessary before:

- A) A species can be observed
- B) Nomenclature can be carried out properly
- C) A habitat can be found
- D) A taxon can become a kingdom

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT says nomenclature is possible when the organism is correctly described and we know which organism the name is attached to—this is identification.

NCERT page: 4

Scientific names of plants are governed by principles provided in:

- A) ICZN
- B) ICBN
- C) Systema Naturae
- D) Taxonomic hierarchy

II PAUSE & ANSWER

Correct Answer: B

Explanation

The PDF states that plant scientific names are based on principles in the International Code for Botanical Nomenclature (ICBN).

NCERT page: 4

Animal taxonomists have evolved:

- A) ICBN
- B) ICZN
- C) Binomial taxonomy
- D) Systema Naturae

II PAUSE & ANSWER

Correct Answer: B

Explanation

ICZN stands for International Code of Zoological Nomenclature and is given for animal naming.

NCERT page: 4

The system of giving an organism a two-word scientific name is called:

- A) Trinomial nomenclature
- B) Binomial nomenclature
- C) Numerical taxonomy
- D) Systematics

II PAUSE & ANSWER

Correct Answer: B

Explanation

Two components—generic name and specific epithet—form binomial nomenclature.

NCERT page: 4

Who gave the naming system described as binomial nomenclature in the chapter?

- A) Ernst Mayr
- B) Carolus Linnaeus
- C) Robert May
- D) Whittaker

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT states that the naming system was given by Carolus Linnaeus.

NCERT page: 4

In *Mangifera indica*, 'Mangifera' represents the:

- A) Specific epithet
- B) Family
- C) Genus
- D) Species

II PAUSE & ANSWER

Correct Answer: C

Explanation

The first word is the generic name; Mangifera is the genus.

NCERT page: 4

In *Mangifera indica*, 'indica' represents the:

- A) Genus
- B) Specific epithet
- C) Family
- D) Order

II PAUSE & ANSWER

Correct Answer: B

Explanation

The second component is the specific epithet.

NCERT page: 4

Biological names are generally written in:

- A) Greek only
- B) Latin or Latinised form
- C) English only
- D) Any local language

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT says biological names are generally in Latin and are Latinised or derived from Latin.

NCERT page: 4

The first word of a biological name begins with:

- A) A small letter
- B) A capital letter
- C) A number
- D) Any letter

II PAUSE & ANSWER

Correct Answer: B

Explanation

The generic name starts with a capital letter.

NCERT page: 5

The specific epithet in a biological name begins with:

- A) A capital letter
- B) A small letter
- C) A number
- D) A Greek symbol

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT explicitly states that the specific epithet starts with a small letter.

NCERT page: 5

When handwritten, the two words of a biological name should be:

- A) Written in capitals
- B) Separately underlined
- C) Joined with a hyphen
- D) Written without spaces

II PAUSE & ANSWER

Correct Answer: B

Explanation

Each word is separately underlined when handwritten; printed names are italicised.

NCERT page: 4-5

In printed form, biological names are indicated by:

- A) Bold letters
- B) Italics
- C) Quotation marks
- D) Capital letters throughout

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT states that biological names are written in italics when printed.

NCERT page: 4

The abbreviated author name after a scientific name indicates:

- A) The collector of the organism
- B) Who first described the species
- C) The habitat of the species
- D) The family name

II PAUSE & ANSWER

Correct Answer: B

Explanation

For example, 'Linn.' after *Mangifera indica* indicates Linnaeus first described it.

NCERT page: 5

Classification is the process of grouping organisms into:

- A) Random categories
- B) Convenient categories based on observable characters
- C) Only evolutionary groups
- D) Only habitats

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT defines classification as grouping into convenient categories based on easily observable characters.

NCERT page: 5

Scientific categories such as plants, animals, mammals and dogs are called:

- A) Genes
- B) Taxa
- C) Cells
- D) Species only

II PAUSE & ANSWER

Correct Answer: B

Explanation

Such categories are taxa; taxon is the unit/category of classification.

NCERT page: 5

The plural form of taxon is:

A) Taxons

B) Taxa

C) Taxae

D) Taxonomy

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT gives taxon as singular and taxa as plural.

NCERT page: 5

The branch dealing with characterisation, identification, classification and nomenclature is:

- A) Ecology
- B) Taxonomy
- C) Physiology
- D) Anatomy

II PAUSE & ANSWER

Correct Answer: B

Explanation

These processes are basic to taxonomy.

NCERT page: 5

Which is NOT listed as a basis of modern taxonomic studies in the PDF?

- A) External structure
- B) Internal structure
- C) Cell structure
- D) Market value

II PAUSE & ANSWER

Correct Answer: D

Explanation

Modern taxonomic studies use external/internal structure, cell structure, development and ecological information—not market value.

NCERT page: 5

Which set contains the basic processes of taxonomy given in NCERT?

- A) Growth, reproduction, metabolism, evolution
- B) Characterisation, identification, classification, nomenclature
- C) Digestion, respiration, excretion, reproduction
- D) Observation, experiment, hypothesis, theory

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT explicitly lists these four processes as basic to taxonomy.

NCERT page: 5

The earliest classifications were mainly based on:

- A) DNA sequences
- B) Uses of organisms
- C) Chromosome number
- D) Evolutionary trees

II PAUSE & ANSWER

Correct Answer: B

Explanation

Early classifications were based on the uses of organisms for food, clothing and shelter.

NCERT page: 5

Systematics primarily takes into account:

- A) Only local names
- B) Evolutionary relationships between organisms
- C) Only body colour
- D) Only economic importance

II PAUSE & ANSWER

Correct Answer: B

Explanation

The scope of systematics includes identification, nomenclature, classification and evolutionary relationships.

NCERT page: 6

The word 'systematics' is derived from the Latin word:

- A) Species
- B) Systema
- C) Taxa
- D) Natura

II PAUSE & ANSWER

Correct Answer: B

Explanation

Systematics comes from the Latin word systema, meaning systematic arrangement.

NCERT page: 6

Linnaeus used which title for his publication?

- A) Origin of Species
- B) Systema Naturae
- C) Species Plantarum only
- D) Taxonomic Hierarchy

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT states that Linnaeus used *Systema Naturae* as the title of his publication.

NCERT page: 6

A taxonomic hierarchy consists of:

- A) Only species
- B) All taxonomic categories arranged in ranks
- C) Only kingdoms
- D) Only genera

II PAUSE & ANSWER

Correct Answer: B

Explanation

All categories together constitute the taxonomic hierarchy.

NCERT page: 6

Each step/rank in classification is called a:

- A) Taxonomic category
- B) Cell
- C) Population
- D) Habitat

II PAUSE & ANSWER

Correct Answer: A

Explanation

Each step represents a rank or category; all categories together form the taxonomic hierarchy.

NCERT page: 6

A unit of classification representing a rank is commonly termed:

- A) Taxon
- B) Species only
- C) Genus only
- D) Kingdom only

II PAUSE & ANSWER

Correct Answer: A

Explanation

A taxon is the unit of classification at a particular rank.

NCERT page: 6

Insects are recognised in the chapter by the presence of:

- A) Two pairs of legs
- B) Three pairs of jointed legs
- C) Four pairs of wings
- D) A notochord

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT uses three pairs of jointed legs as a recognisable feature of insects.

NCERT page: 6

Q31 • MODERATE

Which sequence correctly represents the taxonomic hierarchy from lower to higher category?

- A) Species → Genus → Family → Order → Class → Phylum → Kingdom
- B) Kingdom → Phylum → Class → Order → Family → Genus → Species
- C) Genus → Species → Family → Order → Class → Kingdom → Phylum
- D) Species → Family → Genus → Order → Class → Kingdom → Phylum

II PAUSE & ANSWER

Correct Answer: A

Explanation

The hierarchy ascends from species through genus, family, order, class, phylum/division to kingdom.

NCERT page: 6-8

Which is the lowest taxonomic category among the following?

A) Family

B) Genus

C) Species

D) Order

II PAUSE & ANSWER

Correct Answer: C

Explanation

Species is the lowest category in the hierarchy described in the PDF.

NCERT page: 6

Which category contains related species?

- A) Family
- B) Genus
- C) Order
- D) Kingdom

II PAUSE & ANSWER

Correct Answer: B

Explanation

A genus comprises a group of related species with more characters in common than species of other genera.

NCERT page: 7

Which category contains related genera?

A) Species

B) Family

C) Class

D) Phylum

II PAUSE & ANSWER

Correct Answer: B

Explanation

Family is a group of related genera.

NCERT page: 7

An order is an assemblage of:

- A) Related species
- B) Related genera only
- C) Families with a few similar characters
- D) Different kingdoms

II PAUSE & ANSWER

Correct Answer: C

Explanation

Order is a higher category made up of families sharing some similar characters.

NCERT page: 7

A class includes:

- A) Related orders
- B) Related species only
- C) Related genera only
- D) Only one family

II PAUSE & ANSWER

Correct Answer: A

Explanation

Class is the category that includes related orders.

NCERT page: 7

Q37 • MODERATE

In animals, classes such as fishes, amphibians, reptiles, birds and mammals are included in:

- A) Family
- B) Phylum Chordata
- C) Order Carnivora
- D) Kingdom Plantae

II PAUSE & ANSWER

Correct Answer: B

Explanation

The chapter places these classes in phylum Chordata based on common features such as notochord and dorsal hollow neural system.

NCERT page: 7-8

In plants, the category corresponding to phylum is generally called:

- A) Division
- B) Order
- C) Family
- D) Class

II PAUSE & ANSWER

Correct Answer: A

Explanation

The PDF states that in plants, classes with some similar characters are assigned to a higher category called Division.

NCERT page: 8

All animals belonging to various phyla are assigned to:

- A) Kingdom Plantae
- B) Kingdom Animalia
- C) Class Mammalia
- D) Division Angiospermae

II PAUSE & ANSWER

Correct Answer: B

Explanation

Kingdom Animalia is the highest category described for animals in the chapter.

NCERT page: 8

Q40 • MODERATE

As we move from species towards kingdom, the number of common characteristics generally:

- A) Increases
- B) Decreases
- C) Remains identical
- D) Becomes zero

II PAUSE & ANSWER

Correct Answer: B

Explanation

Higher categories are broader and share fewer common characteristics.

NCERT page: 8

Q41 • MODERATE

As we move from species to kingdom, determining relationships generally becomes:

- A) Easier
- B) More complex
- C) Unchanged
- D) Impossible in every case

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT states that higher categories have fewer shared characteristics and relationships become harder to determine.

NCERT page: 8

Which statement is correct regarding lower taxa?

- A) They share fewer characteristics
- B) They share more characteristics
- C) They always contain more organisms
- D) They are always harder to identify

II PAUSE & ANSWER

Correct Answer: B

Explanation

Lower taxa have more characteristics in common among their members.

NCERT page: 8

Q43 • MODERATE

Potato and brinjal are different species but belong to the same:

- A) Family only
- B) Genus Solanum
- C) Order only
- D) Kingdom only

II PAUSE & ANSWER

Correct Answer: B

Explanation

Both are different species of genus Solanum.

NCERT page: 7

Q44 • MODERATE

Lion, leopard and tiger are all species belonging to:

- A) Felis
- B) Panthera
- C) Solanum
- D) Homo

II PAUSE & ANSWER

Correct Answer: B

Explanation

Panthera includes Panthera leo, P. pardus and P. tigris.

NCERT page: 7

The genus *Panthera* differs from the genus:

- A) *Solanum*
- B) *Felis*
- C) *Homo*
- D) *Mangifera*

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT contrasts Panthera with Felis, which includes cats.

NCERT page: 7

Solanum, Petunia and Datura are placed in the family:

- A) Felidae
- B) Solanaceae
- C) Canidae
- D) Anacardiaceae

II PAUSE & ANSWER

Correct Answer: B

Explanation

These three genera are given as examples under family Solanaceae.

NCERT page: 7

Panthera and Felis are placed in the family:

- A) Canidae
- B) Felidae
- C) Solanaceae
- D) Poaceae

II PAUSE & ANSWER

Correct Answer: B

Explanation

The chapter places *Panthera* and *Felis* in Felidae.

NCERT page: 7

Cat and dog are separated into different families because they show:

- A) No similarities
- B) Some similarities and some differences
- C) Identical reproductive features
- D) Identical genera

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT states that cats and dogs have similarities but are placed in different families, Felidae and Canidae.

NCERT page: 7

Convolvulaceae and Solanaceae are included in the order:

- A) Carnivora
- B) Polymoniales
- C) Primata
- D) Poales

II PAUSE & ANSWER

Correct Answer: B

Explanation

The PDF gives these plant families as examples of order Polymoniales.

NCERT page: 7

The order Carnivora includes which families in the example?

- A) Felidae and Canidae
- B) Solanaceae and Poaceae
- C) Hominidae and Felidae
- D) Anacardiaceae and Poaceae

II PAUSE & ANSWER

Correct Answer: A

Explanation

Carnivora includes Felidae and Canidae in the chapter's example.

NCERT page: 7

Order Primata is placed in class:

- A) Insecta
- B) Mammalia
- C) Chordata
- D) Angiospermae

II PAUSE & ANSWER

Correct Answer: B

Explanation

Primata, including monkey, gorilla and gibbon, is placed in Mammalia.

NCERT page: 7

Which is the correct classification of humans at the species and genus levels?

- A) Homo = species; sapiens = genus
- B) Homo = genus; sapiens = species
- C) Both are families
- D) Both are species

II PAUSE & ANSWER

Correct Answer: B

Explanation

Humans belong to species sapiens and genus Homo; scientific name is Homo sapiens.

NCERT page: 7

In *Panthera leo*, 'leo' is the:

- A) Genus
- B) Specific epithet
- C) Family
- D) Order

II PAUSE & ANSWER

Correct Answer: B

Explanation

The first word is the genus; leo is the specific epithet.

NCERT page: 6

In *Solanum tuberosum*, 'Solanum' is the:

- A) Specific epithet
- B) Genus
- C) Family
- D) Order

II PAUSE & ANSWER

Correct Answer: B

Explanation

Solanum is the genus and tuberosum is the specific epithet.

NCERT page: 6

Which pair is correctly matched?

- A) Homo—specific epithet
- B) sapiens—genus
- C) Panthera—genus
- D) indica—family

II PAUSE & ANSWER

Correct Answer: C

Explanation

Panthera is the genus in Panthera leo.

NCERT page: 6-7

Which statement about a genus is correct?

- A) It is a group of unrelated families
- B) It is an aggregate of closely related species
- C) It is always a single species
- D) It is the highest category

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT defines genera as aggregates of closely related species.

NCERT page: 7

Which category is immediately above genus in the hierarchy?

- A) Species
- B) Family
- C) Order
- D) Class

II PAUSE & ANSWER

Correct Answer: B

Explanation

The sequence is species → genus → family.

NCERT page: 7-8

Which category is immediately above family?

- A) Genus
- B) Order
- C) Class
- D) Species

II PAUSE & ANSWER

Correct Answer: B

Explanation

The sequence is genus → family → order.

NCERT page: 7-8

Which category is immediately below family?

- A) Genus
- B) Order
- C) Class
- D) Kingdom

II PAUSE & ANSWER

Correct Answer: A

Explanation

Related genera constitute a family, so genus is immediately below family.

NCERT page: 7

Which category is immediately below genus?

A) Species

B) Family

C) Order

D) Class

II PAUSE & ANSWER

Correct Answer: A

Explanation

Species is the lower category immediately below genus.

NCERT page: 6-7

Q61 • DIFFICULT

Which statement best explains why a genus can contain multiple specific epithets?

- A) Every genus has only one species
- B) A genus may include different organisms that share morphological similarities
- C) Specific epithet is another name for family
- D) Genera contain only kingdoms

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT says a genus may have one or more specific epithets representing different organisms with morphological similarities.

NCERT page: 6

Q62 • DIFFICULT

A taxonomist observes external and internal structures, cell structure, development and ecological information. These observations mainly support:

- A) Only nomenclature
- B) Modern taxonomic studies
- C) Only local naming
- D) Only economic classification

II PAUSE & ANSWER

Correct Answer: B

Explanation

These are specifically listed as bases of modern taxonomic studies.

NCERT page: 5

Which option contains only taxa at different hierarchical levels?

- A) Animals, mammals, dogs
- B) Cells, tissues, organs
- C) Genes, DNA, RNA
- D) Food, clothing, shelter

II PAUSE & ANSWER

Correct Answer: A

Explanation

Animals, mammals and dogs are all taxa at different levels, as explained by NCERT.

NCERT page: 5

Q64 • DIFFICULT

If two groups share fewer common characters than two groups at a lower rank, the two groups are more likely to belong to a:

- A) Lower taxon
- B) Higher taxonomic category
- C) Species only
- D) Genus only

II PAUSE & ANSWER

Correct Answer: B

Explanation

Higher categories have fewer common characteristics among their members.

NCERT page: 8

Which pair represents the same taxonomic rank?

- A) Mammalia and Carnivora
- B) Felidae and Canidae
- C) Homo and sapiens
- D) Panthera and Felidae

II PAUSE & ANSWER

Correct Answer: B

Explanation

Felidae and Canidae are both families; the other pairs represent different ranks.

NCERT page: 7

Q66 • DIFFICULT

Which sequence is entirely correct from a particular organism to progressively broader groups?

- A) Homo sapiens → Homo → Hominidae → Primata
- B) Homo → sapiens → Hominidae → Primata
- C) Hominidae → Homo → sapiens → Primata
- D) Primata → Hominidae → Homo → sapiens

II PAUSE & ANSWER

Correct Answer: A

Explanation

For humans: species sapiens, genus Homo, family Hominidae, order Primata.

NCERT page: 7-8

Which of the following correctly compares species and genus?

- A) Species is broader than genus
- B) Genus comprises related species and is higher than species
- C) Genus is lower than species
- D) Species comprises related genera

II PAUSE & ANSWER

Correct Answer: B

Explanation

A genus is an aggregate of closely related species and is therefore a higher category.

NCERT page: 7

Which statement about family is most accurate according to the chapter?

- A) It always contains species of one genus
- B) It contains related genera and shows fewer similarities than genus and species
- C) It is lower than species
- D) It contains related kingdoms

II PAUSE & ANSWER

Correct Answer: B

Explanation

Family groups related genera and has fewer similarities than species/genus.

NCERT page: 7

Which statement correctly explains the increase in classification complexity from species to kingdom?

- A) Higher taxa have more shared characters
- B) Higher taxa are broader, have fewer shared characters and make relationships harder to determine
- C) Species contain more kingdoms
- D) Kingdom contains fewer organisms

II PAUSE & ANSWER

Correct Answer: B

Explanation

This directly combines the hierarchy explanation given on page 8.

NCERT page: 8

Which of the following is correctly paired with the basis mentioned in the PDF?

- A) Order—single character only
- B) Family—aggregates of related genera
- C) Genus—related kingdoms
- D) Kingdom—single species

II PAUSE & ANSWER

Correct Answer: B

Explanation

Family is a group of related genera.

NCERT page: 7

Which option correctly identifies all four processes basic to taxonomy?

- A) Characterisation, identification, classification, nomenclature
- B) Identification, respiration, classification, nomenclature
- C) Characterisation, evolution, digestion, nomenclature
- D) Classification, metabolism, identification, ecology

II PAUSE & ANSWER

Correct Answer: A

Explanation

NCERT explicitly lists characterisation, identification, classification and nomenclature.

NCERT page: 5

A scientific name has its first word capitalised and second word lowercase. Which rule is being followed?

- A) The first word is genus and second is specific epithet
- B) Both words are family names
- C) The first word is species and second is genus
- D) Both words are orders

II PAUSE & ANSWER

Correct Answer: A

Explanation

This is the standard two-word rule described in the chapter.

NCERT page: 4-5

Which scientific name follows the capitalization rule given in the PDF?

- A) mangifera Indica
- B) Mangifera indica
- C) MANGIFERA INDICA
- D) Mangifera Indica

II PAUSE & ANSWER

Correct Answer: B

Explanation

The genus begins with a capital letter and the specific epithet with a small letter.

NCERT page: 5

Which pair contains one plant example and one animal example with the same hierarchical idea?

- A) *Mangifera indica* and *Homo sapiens*
- B) Poaceae and wheat only
- C) *Panthera* and Felidae only
- D) Mammalia and Angiospermae

II PAUSE & ANSWER

Correct Answer: A

Explanation

Both are binomial scientific names illustrating genus + specific epithet.

NCERT page: 4-7

Which statement is consistent with the chapter's description of scientific names?

- A) Every organism can have many official scientific names
- B) Scientific names help ensure an organism has one accepted name and avoid reuse for another known organism
- C) Local names are universally standard
- D) Scientific names must be in English

II PAUSE & ANSWER

Correct Answer: B

Explanation

The chapter says scientific names ensure each organism has only one name and that the name has not been used for another known organism.

NCERT page: 4

Q76 • MOST DIFFICULT

A taxon at a higher rank contains organisms with fewer shared characteristics than a taxon at a lower rank. Which conclusion follows?

- A) Higher taxa are narrower and easier to identify
- B) Higher taxa are broader and relationships among members are more difficult to determine
- C) Higher taxa contain only one species
- D) Lower taxa always contain more kingdoms

II PAUSE & ANSWER

Correct Answer: B

Explanation

This is the relationship between breadth, common characters and complexity stated by NCERT.

NCERT page: 8

Q77 • MOST DIFFICULT

Consider four statements: I. Genus groups related species. II. Family groups related genera. III. Order groups related families. IV. Class groups related families. Which is correct?

- A) I and II only
- B) I, II and III only
- C) II, III and IV only
- D) I, II, III and IV

II PAUSE & ANSWER

Correct Answer: B

Explanation

I, II and III are correct. Class includes related orders, not related families.

NCERT page: 7

Q78 • MOST DIFFICULT

A student writes 'Mangifera Indica Linn.' Which single rule is violated in the species name?

- A) The genus should be lowercase
- B) The specific epithet should start with a small letter
- C) The author should come before the genus
- D) The name should contain three genera

II PAUSE & ANSWER

Correct Answer: B

Explanation

The specific epithet indica must begin with a small letter.

NCERT page: 5

Q79 • MOST DIFFICULT

Which combination is completely correct? I. Potato—*Solanum tuberosum*. II. Brinjal—*Solanum*. III. Lion—*Panthera leo*. IV. Human—*Homo sapiens*.

- A) I and II only
- B) II and III only
- C) I, II and III only
- D) I, II, III and IV

II PAUSE & ANSWER

Correct Answer: D

Explanation

All four examples are explicitly supported by the chapter.

NCERT page: 6-7

Which statement best integrates taxonomy and systematics as described in the chapter?

- A) Taxonomy deals only with evolution
- B) Systematics includes identification, nomenclature, classification and evolutionary relationships
- C) Systematics excludes classification
- D) Taxonomy is only the naming of organisms

II PAUSE & ANSWER

Correct Answer: B

Explanation

The chapter says systematics has an enlarged scope including identification, nomenclature, classification and evolutionary relationships.

NCERT page: 6

[AIPMT 2010] The scientific name of mango is correctly written as:

- A) *Mangifera indica*
- B) *mangifera indica*
- C) *Mangifera Indica*
- D) *MANGIFERA INDICA*

II PAUSE & ANSWER

Correct Answer: A

Explanation

The generic name begins with a capital letter and the specific epithet begins with a small letter.

NCERT page: 5

PYQ / PYQ source attribution included on the question slide.

[NEET 2016 Phase 1] Which statement is contrary to the universal rules of nomenclature?

- A) The first word represents the genus and the second the specific epithet
- B) Names are generally Latin and italicised
- C) When handwritten, the two words are separately underlined
- D) The first word represents the specific epithet and the second represents the genus

II PAUSE & ANSWER

Correct Answer: D

Explanation

NCERT states the first word is the genus and the second is the specific epithet.

NCERT page: 4-5

PYQ / PYQ source attribution included on the question slide.

[NEET 2016 Phase 2] In housefly classification, which matching is correct?

- A) Family—Muscidae; Order—Diptera; Class—Insecta; Phylum—Arthropoda
- B) Family—Diptera; Order—Muscidae; Class—Arthropoda; Phylum—Insecta
- C) Family—Insecta; Order—Arthropoda; Class—Diptera; Phylum—Muscidae
- D) Family—Arthropoda; Order—Insecta; Class—Diptera; Phylum—Muscidae

II PAUSE & ANSWER

Correct Answer: A

Explanation

The table in the NCERT gives Muscidae, Diptera, Insecta and Arthropoda for housefly.

NCERT page: 8

PYQ / PYQ source attribution included on the question slide.

[NEET 2017] Which of the following represents the order of horse?

- A) Equidae
- B) Perissodactyla
- C) Caballus
- D) Ferus

II PAUSE & ANSWER

Correct Answer: B

Explanation

Perissodactyla is the order; Equidae is family, Caballus genus and ferus specific epithet.

NCERT page: 7-8

PYQ / PYQ source attribution included on the question slide.

[NEET 2019] Which is against the rules of ICBN?

- A) Handwritten scientific names should be underlined
- B) Every species should have a generic name and a specific epithet
- C) Scientific names are in Latin and italicised
- D) Generic and specific names should both start with small letters

II PAUSE & ANSWER

Correct Answer: D

Explanation

The generic name starts with a capital letter; the specific epithet starts with a small letter.

NCERT page: 5

PYQ / PYQ source attribution included on the question slide.

[NEET 2019] Select the correctly written scientific name of mango first described by Carolus Linnaeus:

- A) *Mangifera indica* Linn.
- B) *Mangifera indica* Car. Linn.
- C) *Mangifera Indica* Linn.
- D) *mangifera indica* Linn.

II PAUSE & ANSWER

Correct Answer: A

Explanation

The NCERT example is *Mangifera indica* Linn.; Linn. indicates Linnaeus.

NCERT page: 5

PYQ / PYQ source attribution included on the question slide.

[NEET 2022] Which hierarchical arrangement is correct for animals?

- A) Kingdom → Phylum → Class → Order → Family → Genus → Species
- B) Kingdom → Class → Phylum → Family → Order → Genus → Species
- C) Kingdom → Order → Class → Phylum → Family → Genus → Species
- D) Kingdom → Order → Phylum → Class → Family → Genus → Species

II PAUSE & ANSWER

Correct Answer: A

Explanation

This is the ascending order from kingdom down to species; reversing it gives species to kingdom.

NCERT page: 6-8

[NEET 2023 Phase 2] X and Y are the components of binomial nomenclature. This system was proposed by Z. Correct identification is:

- A) X=specific epithet, Y=generic name, Z=Linnaeus
- B) X=generic name, Y=specific epithet, Z=Whittaker
- C) X=generic name, Y=specific epithet, Z=Carolus Linnaeus
- D) X=specific epithet, Y=generic name, Z=Whittaker

II PAUSE & ANSWER

Correct Answer: C

Explanation

Binomial nomenclature uses generic name + specific epithet and is attributed in NCERT to Carolus Linnaeus.

[Re-NEET 2026] Genus represents:

- A) A group of closely related families
- B) An individual plant or animal
- C) A population of plants and animals
- D) A group of closely related species

II PAUSE & ANSWER

Correct Answer: D

Explanation

NCERT defines genera as aggregates of closely related species.

NCERT page: 7

PYQ / PYQ source attribution included on the question slide.

[Re-NEET 2026] Arrange the categories in ascending order: Genus, Class, Order, Phylum, Family, Kingdom, Species.

- A) Kingdom → Class → Order → Species → Phylum → Family → Genus
- B) Species → Genus → Family → Order → Class → Phylum → Kingdom
- C) Genus → Order → Phylum → Species → Kingdom → Class → Family
- D) Species → Order → Class → Family → Genus → Phylum → Kingdom

II PAUSE & ANSWER

Correct Answer: B

Explanation

Ascending from the lowest category gives species → genus → family → order → class → phylum → kingdom.

NCERT page: 6-8

PYQ / PYQ source attribution included on the question slide.

[Re-NEET 2026] For mango, which matching of taxonomic categories is correct?

- A) Family—Anacardiaceae; Genus—Mangifera; Class—Dicotyledonae; Phylum/Division—Angiospermae; Order—Sapindales
- B) Family—Sapindales; Genus—Anacardiaceae; Class—Mangifera; Phylum—Dicotyledonae; Order—Angiospermae
- C) Family—Mangifera; Genus—Sapindales; Class—Anacardiaceae; Phylum—Angiospermae; Order—Dicotyledonae
- D) Family—Dicotyledonae; Genus—Angiospermae; Class—Sapindales; Phylum—Mangifera; Order—Anacardiaceae

II PAUSE & ANSWER

Correct Answer: A

Explanation

The NCERT table gives Mangifera, Anacardiaceae, Sapindales, Dicotyledonae and Angiospermae for mango.

NCERT page: 8

[AIPMT 2011] Which animal is correctly matched with its taxonomic category?

- A) Cuttlefish—Mollusca, a class
- B) Humans—Primate, the family
- C) Housefly—Musca, an order
- D) Tiger—Tigris, the species

II PAUSE & ANSWER

Correct Answer: D

Explanation

Tiger belongs to species *Panthera tigris*; *tigris* is the specific epithet, not the whole species name, so this option is not perfectly worded. The classic question's intended correct matching is the scientifically correct category relation; use the NCERT hierarchy carefully.

PYQ / PYQ source attribution included on the question slide.

[AIPMT 2001] Which category is less general in characters as compared with genus?

- A) Family
- B) Order
- C) Species
- D) Kingdom

II PAUSE & ANSWER

Correct Answer: C

Explanation

Species is a lower category than genus and therefore has more common characters and is less general.

NCERT page: 6-8

PYQ / PYQ source attribution included on the question slide.

[NEET 2013 Karnataka] The common characteristics between tomato and potato will be maximum at the level of their:

- A) Family
- B) Order
- C) Class
- D) Genus

II PAUSE & ANSWER

Correct Answer: D

Explanation

Tomato and potato are both in genus *Solanum*, so the shared characters are greatest at genus level among the listed ranks.

[AIPMT 2007] ICBN stands for:

- A) International Code for Botanical Nomenclature
- B) Indian Code for Botanical Nomenclature
- C) International Congress of Biological Names
- D) Indian Congress of Botanical Names

II PAUSE & ANSWER

Correct Answer: A

Explanation

The PDF states that plant scientific names follow principles of the International Code for Botanical Nomenclature.

NCERT page: 4

PYQ / PYQ source attribution included on the question slide.

[AIPMT 2003] Species are considered as:

- A) The highest taxonomic category
- B) The lowest category in the hierarchy
- C) A group of related kingdoms
- D) A group of related families

II PAUSE & ANSWER

Correct Answer: B

Explanation

The chapter explicitly states that species is the lowest category in the taxonomic hierarchy.

NCERT page: 6

PYQ / PYQ source attribution included on the question slide.

[NEET 2026] Which statement is NOT true about universal rules of binomial nomenclature?

- A) Biological names are generally in Latin
- B) Both words are separately underlined when handwritten or italicised in print
- C) The specific epithet starts with a small letter
- D) The first word represents the specific epithet and the second denotes the genus

II PAUSE & ANSWER

Correct Answer: D

Explanation

The first word is the genus and the second component is the specific epithet.

NCERT page: 4-5

PYQ / PYQ source attribution included on the question slide.

[AIPMT 2011] The correctly matched taxonomic relation for the tiger is:

- A) Panthera—genus; tigris—specific epithet
- B) Panthera—family; tigris—order
- C) Panthera—species; tigris—genus
- D) Panthera—order; tigris—family

II PAUSE & ANSWER

Correct Answer: A

Explanation

NCERT explicitly uses *Panthera tigris* as an example: *Panthera* is genus and *tigris* is the specific epithet.

NCERT page: 6-7

PYQ / PYQ source attribution included on the question slide.

[NEET 2016 Phase 2] Which statement about species is correct according to the chapter?

- A) Species is above kingdom
- B) Species is the lowest taxonomic category
- C) Species contains related kingdoms
- D) Species is another word for genus

II PAUSE & ANSWER

Correct Answer: B

Explanation

NCERT identifies species as the lowest taxonomic category.

NCERT page: 6

PYQ / PYQ source attribution included on the question slide.

[AIPMT 2003] Biosystematics/systematics primarily aims to account for:

- A) Only local names
- B) Evolutionary relationships among organisms
- C) Only economic uses
- D) Only external colour

II PAUSE & ANSWER

Correct Answer: B

Explanation

The chapter states that systematics takes evolutionary relationships into account.
